

# THE FAIR ENERGY CONSUMER PROTECTION PLEDGE

Your representative's pledge assuring that you have the least expensive cost energy available to you for all of your needs.

I, \_\_\_\_\_, pledge to the citizens of the state of \_\_\_\_\_,  
and to the American people that I will:

- (i) support free-market policies that will stimulate America's energy sector to lawfully compete and flourish, and
- (ii) oppose government taxes, subsidies, regulations, mandates, and bans because they disrupt free and fair competition, generate cronyism, stifle innovation, drive-up costs, impair high-quality production, and ultimately reduce consumers' choices to fewer, lower-quality, higher-priced goods and services.

WHEREAS the Constitution of the United States protects the property rights of all Americans; and

WHEREAS the Constitution of the United States is designed to prevent the expansion of federal power at the expense of individual liberty; and

WHEREAS my purpose in civil service, and my oath to public office, is to support and defend the Constitution of the United States;

THEREFORE, I, \_\_\_\_\_ pledge to the people who entrusted me with this office, that I will support and defend the Constitutional rights and protections that enable the private development and use of energy resources in a free market.

FURTHERMORE, I pledge to support and defend the Constitutional rights of all people to private property, including mineral property, and afford private citizens the freedom to exercise their rights to create abundant energy and prosperity through their private property ownership rights that extend to the subsoil and any minerals they might attain;

I pledge to sponsor, co-sponsor, advocate and vote for legislation to support just compensation for property owners, as guaranteed by the Fifth Amendment of the United States Constitution, in cases where the legal government jurisdiction exercises regulatory power and authority to prohibit the extraction or use of any minerals or assets restricted by such law or regulatory regime;

I pledge to sponsor, co-sponsor, advocate and vote for legislation that prevents the expansion of federal power at the expense of individual property rights and liberty, decreasing the burden of taxation and regulation, and reducing the added seen or unseen costs to consumers; and

I pledge that I will *oppose* legislation or regulations that distort the free market by using government power to create an unfair advantage of one energy source over any other—including the imposition any subsidy or any tax, any mandate or any prohibition, or any government interference of any kind in the free market production, distribution or delivery, or consumption of any energy sources or types available, through current or future innovations.

Name:

Position:

State:

I affirm and pledge without reservation that I will abide by my pledge to the people whom I serve for the term of my service in public office, so help me God.
